for Registrar General, India

NATIONAL SAVINGS

CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs 25,000 in them (inclusive of any Post Office cash certificates held)

● Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT.

* In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used:—B.—Births; B.R.—Birth Rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D.D.—Dysentery and Diarrhoea; R.D.—Respiratory diseases; M.D.—Maternal Deaths; D.R.—Death Rate; I.D.—Infantile Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for week ending the 16th June 1951, relate to 199 towns with an estimated population of 26,183 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 85% of the total number of towns representing 90% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 15,091 and 8,736 representing birth and death rates of 30.0 and 17.3 per thousand of population respectively.

(A) *States (Parts A and C).*—The data here relate to 179 towns with an estimated population of 23,432 thousands. Information about Assam could not be included. The total number of towns is 202 and their population is 25,187 thousands. Thus 89% of the total number of towns representing 93% of the total population is covered. The numbers of births and deaths recorded in these towns were 13,577 and 7,931 representing

birth and death rates of 30.1 and 17.7 per thousand of population respectively. The table at the end gives the position by States.

The towns of Mangalore in Madras and Hathras in Uttar Pradesh recorded high death rates of 54.7 and 52.3 per thousand of population respectively. In Mangalore, the high death rate was largely due to deaths from respiratory diseases and in Hathras it was due to deaths from fevers and dysentery and diarrhoea.

(B) *States (Para B).*—The data here relate to 20 towns with an estimated population of 2,757 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 63% of the total number of towns representing 72% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,514 and 755 representing birth and death rates of 28.5 and 14.2 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
